

Nuffield Centre Dyspraxia Programme NDP3

NDP3 Speech Builder

Due Summer 2010 - see
www.ndp3.org for details

For the successful management of Developmental verbal Dyspraxia/ Childhood apraxia of speech and other severe speech disorders

Completely revised 2004, updated 2005, printed 2004, 2005, 2007, 2009

The Nuffield Dyspraxia Programme is used by thousands of speech and language professionals around the world to manage Developmental verbal Dyspraxia and other severe speech disorders. This Third Edition, NDP3 ...

- Is a complete and highly flexible resource, spanning pre-speech to connected speech.
- Starts from the child's strengths, incorporating the speech skills he already has.
- Provides detailed guidance on planning and management.
- Develops a complete inventory of speech sounds at different levels of phonotactic complexity.
- Includes over 550 structured worksheets to allow for practice at home and school.
- Is designed for 3-7 year olds, but can be adapted for younger or older children.
- Ensures that therapy remains fresh, engaging and stimulating.

Latest print-run update includes
pre-sorted therapy cards, tough packing case, new flip-book wallet

Nuffield Centre Dyspraxia Programme 3rd Edition: NDP3

Completely revised 2004, updated 2005, printed 2004, 2005, 2007, 2009

From pre-speech to connected speech ... NDP3 is a complete resource and includes a range of enhanced and unique materials for assessment and therapy.

NDP3 starts from pre-speech motor skills, for children who need this level, and works systematically to connected speech.

Clinician-friendly

Each Programme comprises a five ring-binder set, including Therapy Manual, Therapy worksheets, Advice sheets for parents, six 20-page Assessment flip-books, Assessment forms and 1,876 Therapy cards.

NDP3 includes 550 photocopiable worksheets, for use in therapy and home practice, and allows comprehensive 'tailoring' to each child's specific needs.

Flexible treatment planning

The Manual provides very detailed information on treatment planning and management, guidance on where to start, how to progress in achievable steps and what strategies to adopt to deal with problems.

However, the approach is not prescriptive. Therapists have the flexibility to plan an individual therapy programme for a specific child using the materials.

Above: The complete Nuffield Dyspraxia Programme 3rd Edition (NDP3) includes the latest Therapy Manual, Assessment worksheets, four packs of 469 (1,876) Therapy cards spread across two boxes, a complete set of Assessment forms and Assessment flip-books.

Above: Optional additional sets of Therapy cards, comprising 4 sets of 469 cards divided into two boxes

Below: Optional additional sets of Assessment flip-books (Assessment forms not included)

Please note NDP3 complete contains a full set of Therapy cards and a full set of Assessment flip-books

Folder 1: Therapy manual

A detailed 245-page manual provides comprehensive guidance notes, planning advice, case studies, ideas for working with children of all ages, and suggestions for tasks, activities and games.

Folder 2: Assessment resources

An updated oro-motor and speech Assessment procedure contains six 20-page Assessment flip-books (also available separately) and Assessment forms.

Folders 3-5: Therapy worksheets

- **Over 550 worksheets**, featuring many new drawings, child-friendly designs and additional therapy sections.
- **Worksheets are organised into levels:** oro-motor, single sounds, C+V/V+C, CV, CVCV, CVC, multi-syllabic words, clusters, phrase and clause word combinations, and from sentence level to connected speech.
- **Transition worksheets** facilitate the building of more complex words from single sounds and syllables.
- **Blank worksheets** allow clinicians to design their own worksheets, specific to an individual child's profile of difficulties.

1,876 Therapy picture cards

NDP3 includes 1,876 picture cards (also available separately), four each of the sound & word pictures in the Programme.

Suitability and flexibility

NDP3 can be used with any child with a speech disorder, but the therapy approach is most suitable for children who have significant difficulties in producing single consonant and vowel sounds and whose connected speech is characterised by typical 'dyspraxic' features such as sequencing difficulties, inconsistency, speech sound omissions and substitutions and supra-segmental difficulties.

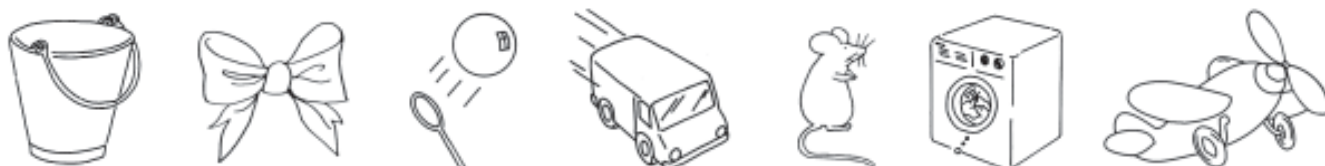

The materials included make NDP3 a very flexible tool, compatible with other treatment approaches eg: auditory discrimination and phonological awareness.

Continual stimulation

The Manual provides hundreds of ideas for activities and games so that therapy remains engaging and stimulating.

How to order

Web	www.ndp3.org
Email	sales@ndp3.org
Fax	0870 836 2466
