- ✓ NEW: heavier paper and tougher dividers and tabs for many years' use.

## NDP3®: A flexible, comprehensive assessment and therapy package for the management of severe speech disorders

**NDP3 offers a non-prescriptive approach that gives SLTs/SLPs the flexibility to plan individual therapy programmes.** It starts from the child's strengths and develops a complete inventory of speech sounds at different levels of phonotactic complexity.

**NEW:** 42 double-sided laminated A5 Articulogram cards, plus 84 Articulogram and early sound making worksheets

**Therapy picture cards:** four each of 478 NDP3 pictures (1,912 total), polypropylene dividers, in engineered box for easy handling

**Comprehensive** speech Assessment procedure, 21 pages, with six 20-page laminated Assessment flip-books

NDP3 is especially suitable for children with severe speech disorders, particularly childhood apraxia of speech, who have significant difficulties in producing single consonant and vowel sounds and whose connected speech is characterised by features such as sequencing difficulties, inconsistency, speech sound omissions and substitutions and supra-segmental difficulties.
