- ✓ UPDATED: oromotor section in light of current evidence base.
- ✓ NEW: easy-to-use engineered box for Therapy cards plus plastic dividers.
- ✓ NEW: heavier paper and tougher dividers and tabs for many years' use.

NDP3®: A flexible, comprehensive assessment and therapy package for the management of severe speech disorders

NDP3 offers a non-prescriptive approach that gives SLTs/SLPs the flexibility to plan individual therapy programmes. It starts from the child's strengths and develops a complete inventory of speech sounds at different levels of phonotactic complexity.

Comprehensive speech Assessment procedure, 21 pages, with six 20-page laminated Assessment flip-books

NDP3 is especially suitable for children with severe speech disorders, particularly childhood apraxia of speech, who have significant difficulties in producing single consonant and vowel sounds and whose connected speech is characterised by features such as sequencing difficulties, inconsistency, speech sound omissions and substitutions and supra-segmental difficulties.

NEW: 42 double-sided laminated A5 Articulogram cards, plus 84 Articulogram and early sound making worksheets

Therapy picture cards: four each of 478 NDP3 pictures (1,912 total), polypropylene dividers, in engineered box for easy handling

Speech Builder with
NDP3 Complete

NDP3 Speech Builder Engage children in therapy

- ✓ Plan and create effective speech and language therapy materials
- ✓ Print worksheets, cards, stickers ...
- ✓ Share resources with parents
- ✓ Engage children in therapy
- ✓ Includes the complete set of NDP3 images, NDP3 templates and Jolly Phonics phonemes

NDP3® Speech Builder: now it's easier than ever to create effective, engaging worksheets, cards, stickers, games ...

Speech Builder lets SLTs and SLPs (and assistants, teachers, parents and children) create and work with individually-designed therapy worksheets and activities.

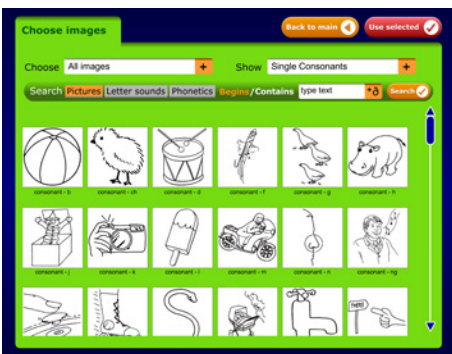

Includes the complete library of **700+ NDP3 images**, plus a full set of Jolly Phonics phoneme illustrations.

Add vibrant colour to everything with a 'magic paintbrush.'

Pictures can be freely moved, scaled, distorted, rotated and duplicated.

Add colourful text in regular fonts and phonetic characters.

Add your own images – or images relevant to the child, such as a pet, or other helpful pictures.

Search every image by title, letter-sounds and phonetics – it's easy to find just the right sounds, contrasts, transitions and combinations.

Includes the full set of NDP3 sequencing, transition, grid and cards templates.

Add notes on each project, such as the child's progress.

Share projects as JPEGs with other therapists, teachers and parents.

*PC refers to Windows or Mac PC - Speech Builder runs on both
